Release Notes

Product Update 2.3.2

For Geode Connect for PC

These notes include important information for Geode Connect for Windows PC users regarding the most recent release of the app.

Documentation and software updates are located on the Juniper Systems website:

https://www.junipersys.com/support

Updates

- Shows the correct correction source configuration when using receiver firmware 6.1Aa00 and above.
- Includes the Geoid Height Offset data when you export the captured data as a CSV file.
- Aligns $JSIGNAL settings between Geode Connect and Geode hardware after a reset.

- Reduces message size and improves performance at data rates above 1 Hz by removing RRE and VTG messages from the default receiver settings.
- Updates SBAS PRN codes (satellite ID numbers).
- Fixes duplicate GNS messages in the Geode Connect terminal.
