

A2

Ethernet Single & Multi Docks

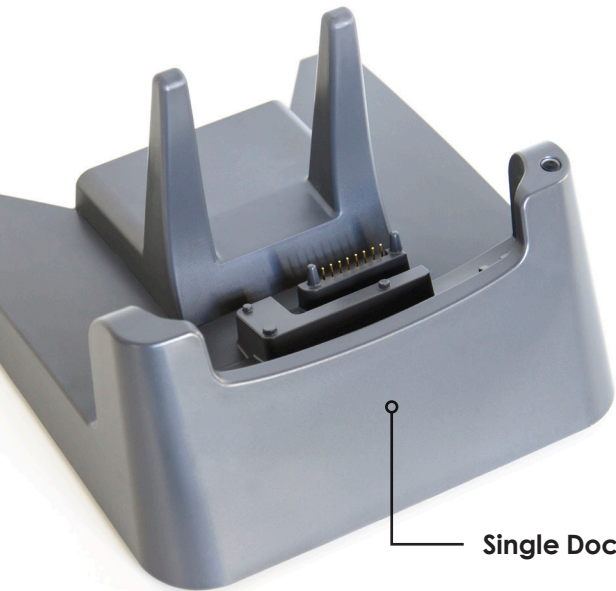

One Convenient Location

The A2 Ethernet Single & Multi Docks give you charging and syncing capabilities, along with 10/100 Base-T Ethernet connectivity, all from a single, convenient location. Available in both single-bay and multi-bay versions, the A2 Ethernet Docks can provide charging, syncing, and Ethernet connectivity to either a single handheld, or up to four handhelds at a time.

The A2 Ethernet Dock is especially useful for users who do any of the following:

- Need their handheld fully charged on a daily basis
- Often charge & sync their handheld simultaneously
- Tend to lose track of chargers & cables
- Need to connect their handheld to a network via Ethernet
- Share handhelds among multiple teams
- Use the handheld over multiple shifts

Single Dock

Multi Dock

	Single Dock	Multi Dock
