

Release Notes

Firmware Update Version 1.03 for Allegro™ Wireless Keyboard

These notes include important information for our Allegro Wireless Keyboard customers regarding the most recent firmware release.

Documentation is located on the Juniper Systems website:
<https://junipersys.com/support/allegro-wireless-keyboard>.

Resolved Issues in EC 1.03

- Fixed an issue that caused unintended power drain while powered off.

Instructions

Firmware on the Allegro Wireless Keyboard can be updated only at an authorized Juniper Systems repair center.

To check the firmware version,

1. Pair the keyboard to a device.
2. From the paired device, navigate to the list of connected Bluetooth devices.
3. Find the Allegro Wireless Keyboard in the list. The device name will be **Allegro KBD FWX.XX**, where X.XX is the firmware version. For example, if you see Allegro KBD FW1.02, the firmware version is 1.02.
