

Attachable Rugged Tablet Keyboard

CAUTION: The keyboard protects against ingress of water and dust. However, the docking pins and contacts can become corroded and must be dry when connecting the components. Do not use threadlock to secure screws, as this will damage the plastic.

Installation and Usage

Attach the Keyboard

1. Hold the tablet in landscape orientation with the docking pad positioned at the bottom. Place the tablet onto the keyboard. Use the alignment marks (shown below) to place the keyboard correctly on the docking and alignment pins.

Left

Right

2. Once the keyboard and tablet are lined up, snap the hook over the top of the tablet to hold the keyboard securely in place.

Use Orange Symbols and Function Keys

To use an orange symbol or a function key, press the orange modify key, then press the desired key. To lock the orange modify key, press it twice.

Turn On the Keyboard Backlight

To turn on the keyboard backlight, press the orange modify key, then press the backlight key (space bar). The backlight is only visible in low-light environments.

Mesa 4—Turn On the Docking Pads

To power the keyboard, the tablet docking pads must be turned on in the Device Settings app.

1. Go to **Device Settings > Misc.**
2. Turn on **Docking pads.**

Note: For help turning off the on-screen keyboard, go to <https://junipersys.com/support/article/17134>.
