

Release Notes

Uinta™ Data Collection and Mapping Software Version 2.2.0–Beta 6 for Windows, Android, & iOS

These notes provide important information for Juniper Systems' release of Uinta 2.2.0–Beta 6 for Windows, Android, and iOS.

Documentation and software updates are located on the Juniper Systems website: <https://junipersys.com/support/uinta>

Fixes

- Fixed an issue where multipolygons in a shapefile were imported as single polygons, which resulted in missing geometries after import.
- Uinta notifies the user if an imported shapefile contains unsupported geometry types.
- Changed the error message that appears when cloud sync fails due to the server being temporarily unavailable.
- Fixed an issue that could cause Uinta to crash when modifying project access.
