Release Notes

Geode Connect™ for iPhone® and iPad® Product Update 2.5.1

These notes provide important information for Juniper Systems' release of Geode Connect for iPhone and iPad.

Documentation and software updates are located on the Juniper Systems® website: *https://www.junipersys.com/support/geode*

Updates

- Geode Connect now hides the password entered in NTRIP configuration.
- Added the Estimated Vertical Error to the Home screen.
- Added a TCP port in Geode Connect to allow third-party apps, such as QField, to connect to the Geode.
- Added prompts to guide users when creating and managing profiles.
- The Help/Feedback email now includes instructions for submitting log files.
- Added support for NTRIP networks that use chunked transfer encoding.

Fixes

- Resolved an erroneous message that could appear during a Geode factory reset.
- Improved text contrast on the port connection dialog for better readability.
- Resolved an erroneous message that appeared while discovering devices.
- Improved the process for selecting a mount point.
- Clarified the factory reset message for Hemisphere devices.
- Made other small changes to improve the Geode Connect user interface.
