

# Release Notes

## Firmware Update—Embedded Controller (EC) 1.06 For Mesa Pro Rugged Tablets Running the Windows 11 Operating System

These notes include important information for our Mesa Pro customers regarding the most recent release of the Windows 11 operating system firmware. We recommend all users perform this update.

Documentation and software updates are located on our website, <https://www.junipersys.com/support>. To update the firmware, select Mesa Pro, then Downloads.

### Resolved Issues in EC 1.06

- Enable the device to wake up from sleep by plugging in a USB-C device/charger or a DC charger
- On a USB-C device plug in to wake device from sleep, all USB-C devices disconnect and re-enumerate
- Fixed bug where a USB-C cable with no charger attached was being recognized as a charger
- Added USB-C re-enumeration when the device boots up

### Important Update Instructions

When you update the firmware, follow these instructions:

1. Plug external power into the Mesa Pro.
2. Save and close any files or programs.
3. Back up critical data.
4. Run the Embedded Controller update .exe.
5. Follow the on-screen prompts.
6. When the process is complete, launch Device Settings to check the Embedded Controller version.
